

Photo Booth

How To Use

Your party will be taking 4 photos!

1. Gather your party in front of the photobooth with your props!
2. Use the screen as a reference for the photo cut off
3. Have one person push the red button on the left of the photobooth
4. The first photo will go off 10 seconds after the button is pressed
5. After 5 seconds, another photo will go off, until all 4 photos are done
6. By default it will start printing a single print, which comes out as 2 photobooth strips. If your party wants more, press print, and select the number of additional prints.

(Each print = 2 strips)

We will also send out digital copies after the event

7. The photobooth will move on to the next party if the screen is idle for 30 seconds
